Sub: Repairs to scissors crossovers, diamond crossings and washable aprons

A derailment of an Express train had recently taken place at a scissors crossover. CRB and ME visited the spot subsequently and observed that condition of the crossovers in yard was not satisfactory. It was also brought out to their notice that a few washable aprons are in broken condition.

Board (ME) has directed that all the scissors crossovers, diamond crossings and washable aprons should be got inspected and necessary repairs be organized immediately to ensure safety. Wherever replacement/rehabilitation is required for long term improvement, action for the same should also be taken in a time bound manner.
