Ref: Para E-1314 of 'Indian Railway Code For The Engineering Department 2012'.

1. Attention is invited to Para E-1314 of Engineering Code, which reads as follows:

'The Measurement Books should be considered as very important record. All the books belonging to a Division should be numbered serially and a register of them (Form E-1314 given below) should be maintained in the Divisional Office showing (1) the serial number of each book, (2) the name and designation of the person to whom issued; (3) the date of issue and (4) the date of its return, so that its eventual return to the Divisional office may be watched.

A similar register (Form E-1314 given below) should also be maintained in the Sub-Divisional office. Books no longer in use should be withdrawn promptly, even though not completely written up. The eventual return of all measurement books should be insisted on. They should be carefully preserved for ten years. To ensure this, Measurement Books should be carefully listed and made over to the Open Line authorities when the construction / Divisions are closed.'
