In recent past, several policy instructions have been issued. All these aim at improving safety of rail-road users, elimination of level crossings (manned/unmanned) and reducing requirement of manpower. Implementation of instructions like opening of gate @20 minutes, changing normal position "closed to road" to open to road and interlocking of gates shall improve working of gateman. Now, it is upto railways, to enforce above instructions in true spirt and systematic manner. Failure to do so shall defeat the very purpose of issuing above circulars.

Therefore, railways are earnestly requested to work out mechanism in this direction.
