Sub:- Revision of pension in non-ARPAN software.

Please recall that Board (FC) has advised to carry out the exercise of revision of pension on a parallel track, besides ARPAN. It was also advised that the data pertaining to the revised PPOs that are generated in any other platform besides ARPAN may subsequently be ported to ARPAN portal so that reconciliation process is smooth. In this connection, a tentative data structure has now been developed to facilitate data porting from non-ARPAN software to ARPAN (copy enclosed). It may be ensured that the same is incorporated in the non-ARPAN software.

Further, it may be ensured that both old PPO number and new PPO number are conspicuously displayed in the revised PPO to maintain uniform numbering pattern of PPOs. Thorough Checks may also be exercised at appropriate levels to rule out the possibility of generation of duplicate PPOs.

The data may be urgently ported back to ARPAN as per enclosed format.

DA:As above
