SYNOPSIS

1. In Railways, the process of absorption of modernization has been started and still in progress in every sphere of system. These technological up

gradations have shown considerable improvement in the efficiency and manpower productivity in Railways.

2. Keeping in view, all these constraints, the Work Study Cell was assigned to conduct work study of staff strength of Chowkidar of Engineering Department of Samastipur Division with a view to assess the staff requirement as per the existing workload .
3. Chowkidar of Engineering Department also plays a vital role in Indian Railways and leads in performance of any Zonal Railway. At present 59 men are working against Sanction Strength 73 are working in Engineering Department of Samastipur Division as on Sr.DEN(Co-ord) letter no-WE/283/MNP/SPJ/W-6/42 dt. 07.11.2019

Chapter-I

INTRODUCTION

Benchmarking is a continuous process of comparing different units and identifying which one is the best in the business and then learning how this excellence was achieved and setting out to improve the efficiency of those units, which were behind. If this concept is implemented it will result large reduction in the cost and make significant contribution in improving the efficiency of various divisions of Railways, but Samastipur Division has not infrastructure developed than other Division of Indian railway. Hence, reassessments of man power on need base is done.

Chowkidary work is done by chowkidar of Engg. Department of Samastipur Division. Chowkidar are under control of Sr.DEN(Co-ord) and assisted by Sr.DEN, DEN, AEN and other staff. At present overall 59 chowkidar are working against the Sanction Strength 73 in Engineering Department of Samastipur Division.

The working culture of chowkidar are different, the bench marking norm is difficult for calculation of staff. The work study team observed that need base is best option for calculation of staff. Competent Authority has approved a Work Study on "Review of staff strength of Chowkidar of Engineering Department of Samastipur Division.

CHAPTER-III

2.0.0 CRITICAL ANALYSIS, REQUIREMENT OF STAFF VIS-À-VIS WORK LOAD AND RECOMMENDATIONS:

2.1.0 Staff of Chowkidar of Engineering Department of Samastipur Division is working under control of Sr. DEN(Co-ord)/SPJ. To arrive at a factual conclusion on requirement of chowkidar in Engineering Department of Samastipur Division, the work study team collected workload of all activities. For calculation of manpower required, the team applied on spot observations and discussions at various levels and applied on need base.

Since manpower is the biggest component of the expenditure of Indian Railway, rightsizing of manpower to reduce unit costs is an effective way to increase efficiency of Indian Railway.

There is no specific yardstick for measuring workload of Chowkidar of Engineering department of Samastipur division. It is very difficult to assess the efficiency of chowkidar of Engineering department of Samastipur Division, different sections are established in different important station.

As per observation work study team found that 58 chowkidar are required for present work load of Engineering department of Samastipur Division. Hence, work study team observed that 15 posts of Chowkidar may be recommended for surrender.

CHAPTER IV

RECOMMENDATION

As there is no yardstick for calculation of chowkidar, the work study team has made its assessment of staff on the need base, it is observed that at present 15 posts of chowkidar is excess than requirement.

Total Sanction Strength = 73

Total Men on Roll = 59

Total Vacant post =14

Total Staff required =58

Exceeds post =73-58=15 Staff

After going through the requirement of chowkidar, the work study team observed that the 15 posts of Chowkidar may be recommended for surrender and financial saving will be 78.87 Lac per annum. The work is going on without any hindrance.
