(E-File no.3335171)

2020/M(C)/141/2Pt

New Delhi, Date: 27.09.2024

Director General
IRIMEE, Jamalpur

Sub: Development of module on Wheel Slip protection (WSP) maintenance on iGOT.

Wheel Slip protection (WSP) plays an important role in prevention of wheel shelling in LHB coaches. Of late, this issue has been discussed in detail with various Zonal Railways and efforts have been made to provide training to all depots for downloading of data, analysis of faults and their rectification.

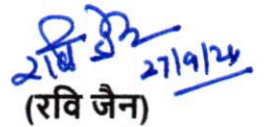

A review was held in Railway Board regarding maintenance of coaches, and it was seen that WCR is doing a very good job in maintenance of WSP systems.

In this regard, IRIMEE is nominated to develop a training module in iGOT for maintenance of WSP systems in consultation with WCR & RDSO, for training of all supervisors and staff over IR. Extensive coverage of critical items, good maintenance practices, troubleshooting; do's-and-don'ts, explanatory videos on downloading and analysis of data etc. should be developed by IRIMEE. RDSO may arrange assistance through OEMs and PUs as well, if required.

Other training materials like presentations, pamphlets etc. may also be developed, and the same should be proliferated across STCs and Zonal training centers across IR, and made part of the refresher courses for ensuring maximum reach in minimum possible time.

IRIMEE should get the same developed by 30.10.2024. Action plan may be submitted to Board by 01.10.2024.

Zonal Railways should ensure that all inspectors, supervisors and staff associated with Coaching Maintenance at Depots, Divisions and Headquarters (incl. Neutral Train Examiners at Workshops) should be trained in the WSP module by 31.12.2024.
