Sub: Joint inspection of Electronic In-motion weighbridges by JA/Sr. Scale Officers of Divisions.

Ref: i) This office letter no. 92/Dev.Cell/IDEI/2 Vol. dated 06.08.2004 & 16.11.2004
ii) Railway Board’s letter No.2013/M(L)466/1(18) dated 15.07.2013.
iii) Discussions on the subject held in CME’s Conference on 18th June 2013.

The directives regarding periodicity of joint inspection of Electronic in-motion weighbridges by the team of Sr. Scale/JA grade officer have been deliberated upon by the Traffic Commercial and Mechanical Directorates of the Board and the revised instructions are as under :-

"The schedule of joint inspection of electronic in-motion weighbridges by Sr. Scale and JA grade officers of the divisions shall be once every year with the condition that such joint inspection be carried out preferably around six months after the weighbridge is certified by the Weights and Measures department as per its annual statutory certification procedure. Other procedures for certification, calibration and re-certification after repairs, etc. shall continue to be observed as per extant instructions issued by Board on the subject."

The time gap of six months from date of annual certification is only a recommendatory guideline to provide for enough time to subject the weighbridge to substantial use so that defects or errors, if any, would be more likely to show up in such joint inspections.
