Sub: Weighment of long haul freight trains by EIMWBs.

At present numerous Railway owned and privately owned EIMWBs have been installed on all Indian Railways as per specification no.WD-29-Misc.-05. The para no. 5.12 of this Specification specifies the weighment of rake comprising of 58 wagons only.

It is understood, that at some locations of IR Long haul trains are also being operated and the EIMWB as per the aforesaid specification are not capable for weighment of these long haul trains.

In view of the above, RDSO is advised to carry out necessary amendment in the specification and advised all the vendors of EIMWB to update their software so that weighbridge is capable of capturing data of long haul trains accordingly.

Matter may be treated as Most Urgent.
