General Managers,
All Indian Railways.

Sub: Operation of Electronic in-motion Weighbridges

Instructions regarding maintaining uniform speed of the rake during weighment on electronic in-motion weighbridges were issued vide Para 4 of Railway Board’s letter mentioned above. In order to ensure the same, “No notching up” board be provided at suitable location on approach to weighbridge after necessary trials so that the train rolls over the weighbridge at almost uniform speed, which is normally 8-10 Kmph, to ensure accuracy of weighment.
