Sub: Agenda Item for Maintenance Study Group Meeting (MSG)
Ref: WCR's letter no. WCR/N-HQ/110/RBd's Corres/Sig-25 pt dated 04.11.19

WCR has proposed to change frequency of maintenance schedule of Colour Light signals from fortnightly to monthly after provision of LED signal lamps. This will require amendment to SEM Part II Para 19.148 (Annexure 30 Item no 1 Section B).

2. Board has felt that there is a need to review the existing provision of maintenance schedule and practices along with addition of new items and ideas introduced in signaling over the years. With remote diagnostic and predictive maintenance system getting implemented, schedule of maintenance needs to be reviewed. Maintenance schedule should also be studied from asset usage basis ie. Assets can be grouped on the basis of usage and the periodicity of maintenance is accordingly assigned. Data logger would have information of asset use.

3. Railways should send items concerning to maintenance to RDSO for inclusion in MSG meeting agenda. RDSO should interact with Railways and organize MSG meeting duly obtaining approval of Railway Board for the meeting agenda items.
