Sub: Damage of TRCs due to infringement within MMD Envelop of track.

It is observed that many times due to infringement within MMD envelope of track by different materials like excessive ballast and other p-way materials etc. the hardware of TRCs gets damaged. The TRCs are costly and sophisticated equipment and once damaged it requires lot of time for repair, which results in backlog of TRC recording.

; It is therefore requested to direct P-Way officials to inspect their section before the scheduled TRC run and make it free from any such obstructions before running of TRC in its route.

(Ashish Bansal)
