Sub: Difference in freight calculated by different systems

NCR has highlighted an issue wherein freight as calculated by freight calculator at FBD portal varies significantly with freight as determined by TMS. The issue primarily appears to be of prioritization of concessions available under various schemes and transportation products like mini rakes.

It is reiterated that circular issued from Board for various concessions and transportation products are well defined and there is no scope of any confusion in this regard.

CRIS is advised to kindly look into the issue so that same freight gets reflected at various portal and TMS leaving no scope for any confusion in the mind of customers.
