Sub: Updating Weighbridge details in TMS system for all loading terminals

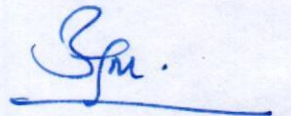

It is learnt from CRIS/FOIS that there is provision for filling weighbridge details under miscellaneous head of 'TMS Web Queries', while updating the station profile.

Zonal Railways are requested to update the details of Associate Weighbridge and Alternate Associate Weighbridge for each loading points (i.e. Goods Shed, Siding, GCT, PFT etc.).

Type of Weighbridge may also be indicated whether EIMWB or Static Weighbridge or Pre-weighbin. If there is no weighbridge available for any loading point, the rail user may indicate as 'No Weighbridge'.

All concerned may be advised to update the weighbridge details, **latest by 28th February, 2025 positively.**

CRIS/FOIS may co-ordinate with Zonal Railways in this regard.
